

Name: Florabelle T. Amper

Course & Year: BSIT-3rd Year

Ma2FinalTask - Part I

Create a Java program where the user is ask about the Student **Name, Phone, Address, Phone** and student **Grades**, after that the **Student data** is printed. **Grades** must be 5 subjects

```
package workspace;
import java.util.*;
public class fivesubject {
    String InputPersonalData;
    String Name;
    String address;
    String age;
    String phone;

    String StudentGrades;
    String Physics;
    String Chemistry;
    String Biology;
    String Mathematics;
    String Computer;
    void print() {

    }

    public static void main(String[] args)
    {
        Scanner in = new Scanner(System.in);
        System.out.println("[Input Personal Data]");
        System.out.println("Enter your name: ");
        String name =in.next();
        System.out.println("Enter your address: ");
        String address =in.next();
        System.out.println("Enter your age: ");
        String age =in.next();
        System.out.println("Enter your phone: ");
        String phone =in.next();

        System.out.println("[Student Grades]");

        System.out.println("Grade Physics: ");
        int phy = in.nextInt();
        System.out.println("Grade Chemistry: ");
        int che = in.nextInt();
        System.out.println("Grade Biology: ");
        int bio = in.nextInt();
        System.out.println("Grade Mathematics: ");
```

```

int math = in.nextInt();
System.out.println("Grade Computer: ");
int comp = in.nextInt();

{
    System.out.println("\n[Input Personal Data]");
}
{
    System.out.println("Enter your name: "+name);
}
{
    System.out.println("Enter your address: "+address);
}
{
    System.out.println("Enter your age: "+age);
}
{
    System.out.println("Enter your phone: "+phone);
}

{
    System.out.println("\n[Student Grades]");
}
{
    System.out.println("Physics: "+ phy);
}

{
    System.out.println("Chemistry: "+ che);
}

{
    System.out.println("Biology: "+ bio);
}

{
    System.out.println("Mathematics: "+ math);
}

{
    System.out.println("Computer: "+ comp);
}

}

}

```

```
16 void print() {
17
18 }
19
20
21 public static void main(String[] args)
<terminated> fivesubject [Java Application] C:\Users\Microsoft\Appl
[Input Personal Data]
Enter your name:
david
Enter your address:
dc
Enter your age:
24
Enter your phone:
9877667655
[Student Grades]
Grade Physics:
88
Grade Chemistry:
99
Grade Biology:
99
Grade Mathematics:
99
Grade Computer:
99
```

```
12 String Chemistry;
13 String Biology;
14 String Mathematics;
15 String Computer;
16 void print() {
17
18 }
19
20
21 public static void main(String[] args)
<terminated> fivesubject [Java Application] C:\Users\Microsoft\AppData\Local\Temp\
[Input Personal Data]
Enter your name: david
Enter your address: dc
Enter your age: 24
Enter your phone: 9877667655
[Student Grades]
Physics: 88
Chemistry: 99
Biology: 99
Mathematics: 99
Computer: 99
```
